

How to adjust notifications

Through **My Kaspersky**

- Sign in to your My Kaspersky account.
- Click The notifications icon on **My Kaspersky > Settings**.

- In the **Kaspersky Safe Kids** section, select preferred notification types and specify the scope of notifications you want to receive.
- Click **Save**.

The screenshot shows the 'Kaspersky Safe Kids' settings window. At the top, there is a '< Back' link. Below it, the section 'Get notifications on the website:' contains three checked items: 'Licenses' (About license expiration, activation problems, etc.), 'Devices' (About security problems on your devices), and 'Support' (Technical Support responses). The main section is titled 'KASPERSKY SAFE KIDS' and contains three toggle switches, all of which are turned on: 'Send summary report by email', 'Send notifications by email', and 'Send push notifications to parent mobile app'. Below these are four categories of notifications, each with a list of checked items: 'Internet:' (Child tried to open forbidden website, Child opened unrecommended website, Child searched on restricted themes), 'Device use:' (Child's device was blocked on schedule, Child used device over limit, Child's device blocked: time limit reached, Child asked for extra time to use device), 'Applications:' (Child tried to use forbidden app), and 'Status:' (Child tried to uninstall Kaspersky Safe Kids). At the bottom right, there are two buttons: 'Close' and 'Save'.
